Goals and Objectives

- **Goal:** A broad, general statement, usually not quantifiable, that expresses a desired state or process to be achieved. Normally, a management goal is stated in terms of purpose, often not attainable in the short term, and provides the context for more specific objectives.
- **Objective:** A concise, time-specific statement of measurable planned results that corresponds to stated goals in achieving the desired outcome. Commonly forms the basis for development of strategies or further planning to define the precise steps to be taken, and the resources to be used and assigns responsibility in achieving the identified goals.
